SKILLS

PROGRAMMING

- HTML5 & CSS3
- JavaScript (ES6+)
- TypeScript
- SQL

FRAMEWORKS

- React 18
- React Router & Redux
- Tailwind CSS · Framer Motion
- Responsive Design

TOOLS & PRACTICES

- Data Visualization / Charts
- UI/UX · Figma
- Accessibility (WCAG basics)
- Vite · Webpack
- Git & GitHub · Vercel
- GitHub Copilot · AI tools

BACKEND & DATA

- REST API Integration
- Supabase · MySQL
- Data Normalization

STRENGTHS

- Problem Solving
- Attention to Detail
- Collaboration
- Adaptability
- Ownership
- Fast Learning

LANGUAGES

- English · Fluent
- Ukrainian · Native
- Russian · Native

PROFESSIONAL SUMMARY

Junior Developer building responsive, accessible web apps with React, TypeScript and modern JavaScript, currently working with a first freelance client. Experienced with REST APIs, relational databases and data visualisation. Expanding into Python and Django through a Full Stack Diploma. Fast learner, ready to own features from day one.

EXPERIENCE

Freelance Web Developer | *HTML · CSS · PDF Design · Python*

Sandra's Bake House · Edmonton, AB · Sep 2026 – Present
github.com/Polinamed57/sandras-bake-house-catalog

- Redesigned a cookie startup's wholesale catalog used for email outreach to Edmonton cafés: 8-page layout in HTML/CSS, exported to PDF with embedded brand fonts.
- Cut the file from 13.5 MB to 1.3 MB by fixing image encoding, corrected allergen labelling, and delivered through several rounds of client feedback.

PROJECTS

Portfolio Website | *React 18 · TypeScript · Vite · Tailwind · Framer Motion*

polina-kovalenko.vercel.app github.com/Polinamed57/Portfolio

- Single-page app built with React 18, TypeScript and Vite: reusable UI components, typed data layer, custom hooks and Framer Motion animations.
- Fully responsive with prefers-reduced-motion support; deployed on Vercel with CI/CD from GitHub.

Expense Tracker | *TypeScript · React · Supabase · Data Visualization*

expenses-tracker-one-orpin.vercel.app github.com/Polinamed57/Expenses-Tracker

- Finance app in TypeScript with Supabase storage for recording, categorizing and analyzing daily expenses.
- Two interactive charts (by category and over time) plus an automated classifier that tags transactions, with reliable error handling across all flows.

Weather App | *JavaScript · REST API · HTML · CSS*

weather-app-knca.vercel.app

- Responsive real-time weather app consuming a third-party REST API, with dynamic UI updates and graceful error handling across devices.

EDUCATION

Front-End Web Development Certificate

University of Alberta · Aug 2025 – May 2026 · **Completed**

- Coursework: HTML5, CSS3, JavaScript, TypeScript, React, REST APIs, relational databases, Git/GitHub and responsive web design.
- Independently extended the curriculum with AI-integrated projects and modern tooling (Vite, Framer Motion, Supabase) beyond program requirements.

Full Stack Web Development Diploma

University of Alberta · Sep 2026 – Nov 2027 · **In progress**

- Coursework: Python, Django, REST Framework, SQL/relational databases, full stack capstone project integrating Django APIs with React.
