STRENGTHS

- ▶ Problem Solving
- ▶ Attention to Detail
- ▶ Collaboration
- ▶ Adaptability
- ▶ Ownership
- ▶ Fast Learning

LANGUAGES

- ▶ English
- ▶ Ukrainian
- ▶ Russian

PROFESSIONAL SUMMARY

Detail-oriented and ambitious Junior Front End Developer with hands-on experience building responsive, user-focused web applications using HTML5, CSS3, JavaScript, TypeScript, and React. Skilled at integrating REST APIs, working with relational databases, and delivering clean, maintainable code. Strong problem solver with a collaborative, client-focused mindset, comfortable in fast-paced environments and eager to take ownership of features while continuing to grow toward full stack development.

PROJECTS

Weather App | JavaScript • REST API • HTML • CSS

🔗 weather-app-knca.vercel.app

- Built a responsive web application that fetches and displays real-time weather data using a third-party REST API.
- Implemented dynamic UI updates and graceful error handling for a smooth experience across desktop and mobile devices.
- Deployed on Vercel with continuous integration from GitHub for streamlined updates and version control.

Expense Tracker | TypeScript • Supabase • AI Integration

🔗 expenses-tracker-one-orphin.vercel.app

- Developed a finance tracking application with persistent database storage using Supabase for secure user data management.
- Integrated AI-powered category search to automatically classify and organize user expenses for a smoother user experience.
- Designed a clean, accessible interface with TypeScript for type safety and improved code reliability.

EDUCATION

Front End Web Development Program

University of Alberta • Aug 2025 – May 2026 • **Completed**

- Coursework: HTML5, CSS3, JavaScript, TypeScript, React, REST APIs, relational databases, Git/GitHub workflow, and responsive web design.
